

Frequently asked questions

When will the next batch of Elektrosluch/Uši be ready?

Sign-up for [this mailing list](#) to stay updated on new batches.

We are a small company and we don't want to sacrifice the quality by speeding up our manufacturing process or outsourcing. That means that we unfortunately have to close our pre-orders once in a while, so we can get some time to serve the current customers.

There are no exact estimates on dates of future batches. Please keep your eye on the mailing-list.

When will you ship my order?

Shipping schedule (as of 11. 8. 2016)

| Product | Scheduled shipping estimate |
|---|-----------------------------|
| Uši, Uši Pro, Uši phantom adapter, Elektrouši | Beginning of October 2016 |

If your order combines products with various shipping estimates, it will be shipped according to the later one. If you have any questions or address change requests, please contact us via [support ticket](#).

What is the recommended wind protection for Uši (Pro)?

We recommend [Bubbles](#) (size 4) by Bubblebee Industries. You can also make your own with bits of faux fur.
