

The Network That Will certainly Earns You 5x More Than AdSense: Media.Net

Media.net started Bing and Yahoo's (they run it together) answer to AdSense

It's a large network that caters to big advertisers. Their advertising roster includes Forbes, Elle, Cosmopolitan, Reuters, and the like.

Their ad design is genius, so the click-through rates are insane.

They also have mobile-specific ad units, which allow you to test and improve specifically for mobile visitors. Media.net does a good job here. Not only do they allow mobile ads, but your account rep will design and test them for you.
