

# Sound Devices MixPre knob

**Specs:** 12mm diameter, 14mm height, 8.5mm internal diameter

The knob is friction-fitted on the original knob, no need to modify your device.

The current design *\*does not\** work with 10T and 10M. [Download version 1.1 \(\\*.stl\)](#) • [Get one from us](#)

Extending the knob increases risk of damaging the original encoder when dropped, since the knob is protruding over the edge of the protective corners. Use at your own discretion.

## Old versions
