

Sound Devices MixPre knob

Specs: 12mm diameter, 14mm height, 8.5mm internal diameter

The knob is friction-fitted on the original knob, no need to modify your device.

The current design *does not* work with 10T and 10M. [Download version 1.1 \(*.stl\)](#) • [Get one from us](#)

Extending the knob increases risk of damaging the original encoder when dropped, since the knob is protruding over the edge of the protective corners. Use at your own discretion.

Old versions
